

# Reusable Catheters for GI Manometry

Mediplus reusable gastrointestinal manometry catheters are ideal for all types of water-perfused manometry of the GI tract. The range comprises four-channel and eight-channel variants in external diameter sizes 2.3mm, 3.9mm and 4.9mm with a range of perfusion port configurations.

NOTE: All catheters have open central lumen for guidewire insertion

Designed and priced for multiple use, they offer the following benefits:

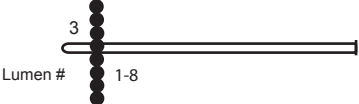

- ★ Small 2.3mm bore catheter - unique to Mediplus - ideal for paediatric applications
- ★ Multiple-channel measurement for a greater range of measurements possible than with microtips
- ★ Transparent tubing, so that any air bubbles in the line will be visible
- ★ Winged luer locks for secure connection to transducers
- ★ Numbered centimetre markings for easy measurement
- ★ Co-extruded stripe to locate channel-one

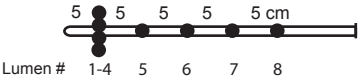

Patent No. GB2379389

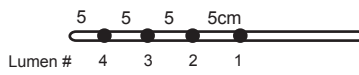

# Reusable Manometry Range

| Code | Product Description | Configuration (cm) | Channels | Length | Tube o.d. | Pack Quantity |
|------|---------------------|--------------------|----------|--------|-----------|---------------|
|------|---------------------|--------------------|----------|--------|-----------|---------------|

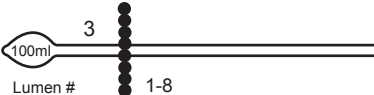

## Oesophageal Manometry

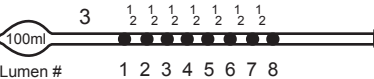

|       |                  |   |   |       |       |   |
|-------|------------------|---|---|-------|-------|---|
| 2208R | Vector Manometry |  | 8 | 180cm | 3.9mm | 1 |
|-------|------------------|---|---|-------|-------|---|

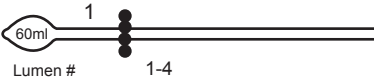

|       |                                     |   |   |       |       |   |
|-------|-------------------------------------|---|---|-------|-------|---|
| 2281R | Eight Channel Oesophageal Manometry |  | 8 | 180cm | 3.9mm | 1 |
|-------|-------------------------------------|---|---|-------|-------|---|

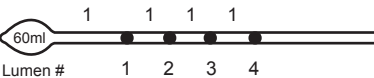

|       |                                    |   |   |       |       |   |
|-------|------------------------------------|---|---|-------|-------|---|
| 2240R | Four Channel Oesophageal Manometry |  | 4 | 180cm | 2.3mm | 1 |
|-------|------------------------------------|---|---|-------|-------|---|

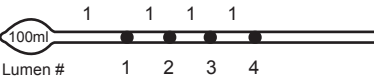

## Anorectal Manometry

|       |                  |  |   |       |       |   |
|-------|------------------|--|---|-------|-------|---|
| 2380R | Vector Anorectal |  | 8 | 180cm | 4.9mm | 1 |
|-------|------------------|--|---|-------|-------|---|

|       |   |   |   |       |       |   |
|-------|---|---|---|-------|-------|---|
| 2381R | Eight Channel Anorectal (1/2cm) Manometry |  | 8 | 180cm | 4.9mm | 1 |
|-------|---|---|---|-------|-------|---|

|       |                                       |   |   |       |       |   |
|-------|---------------------------------------|---|---|-------|-------|---|
| 2340R | Paediatric Vector Anorectal Manometry |  | 4 | 180cm | 3.9mm | 1 |
|-------|---------------------------------------|---|---|-------|-------|---|

|       |                                |   |   |       |       |   |
|-------|--------------------------------|---|---|-------|-------|---|
| 2341R | Paediatric Anorectal Manometry |  | 4 | 180cm | 3.9mm | 1 |
|-------|--------------------------------|---|---|-------|-------|---|

|       |                                  |   |   |       |       |   |
|-------|----------------------------------|---|---|-------|-------|---|
| 2342R | Four Channel Anorectal Manometry |  | 4 | 180cm | 3.9mm | 1 |
|-------|----------------------------------|---|---|-------|-------|---|
